Jack Garforth Joins DVUV as Operations Manager

New Position Readies Company for Next Phase of Growth

CLEVELAND, Ohio – April 6, 2010 – DVUV, LLC announced today that it has hired Jack Garforth as Operations Manager. Mr. Garforth will have responsibility for the following areas of operations management: quality control, production, process improvement and vendor development for the company’s powder application business.

“We’re experiencing tremendous growth both in the number of customers we’re serving as well as the size and complexity of programs our customers are bringing us,” said DVUV’s President Michael F. Knoblauch. “Jack will be a critical resource as we prepare to add a second shift and lay the groundwork for our next phase of growth. I’m confident his well-honed leadership, organizational and manufacturing abilities will provide significant benefits to our customers, partners and employees.”

Mr. Garforth has over 20 years of operations and manufacturing experience including responsibility for a \$180 million automotive coating facility during his tenure with LTV Steel. His primary focus has been improving productivity, quality, safety and process efficiencies using practices such as kaizen, kanban and lean manufacturing and growing staff through mentoring and innovative employee development programs. Mr. Garforth graduated from Ohio University with a degree in operations management and marketing.

About DVUV, LLC

DVUV, LLC is the innovator in UV-cured powdercoated finishes for wood and other heat-sensitive substrates. Since the company’s initial introduction of UV curing and powder coating technologies for wood finishing into North America, DVUV has refined the process and taken the lead in evolving the technology. The company is committed to creating new design possibilities and offering more environmentally sustainable alternatives. All of DVUV’s finishes are completely solvent-free and emit no volatile organic compounds (VOCs) or hazardous air pollutants (HAPs). DVUV provides turnkey production services in a range of industries from retail interiors to medical equipment and educational furniture, manufacturing finished parts to customers’ specifications. Additional information is available at www.dvuv.com.
